

Systematize your approach to *end of life-cycle* compliance

The DDR-1 System is an *end of life-cycle* process that ensures the safety of your information by securing, degaussing and destroying your media. The **DDR-1** System is both a secure area to store media before degaussing and a workstation to perform the degaussing and destroying operations. Color coded bins and a special recycling container categorize the status of the media. The DDR-1 combines the SW-1 Workstation, the HD-3WXL Degausser, the PD-4 Hard Drive Destroyer and the color coded bins all in to one compliance package.

Processing is as easy as 1-2-3

Step One:
Deposit in Secure Drop Area

Step Two:
Degauss with the HD-3WXL

Step Three:
Destroy with PD-4

Complete *end of life-cycle* solutions from
Garner Products, Inc.

The World Leader in Data Elimination

Theft or loss of hard drives is a serious security threat. Controlling your magnetic media during the *end of life-cycle* process in a manner that conforms to government mandates is key to any compliance policy.

The **DDR-1 Secure Workstation** allows users to deposit media ready to be decommissioned, sanitized, erased or destroyed in the secure drop slot on the top of the workstation. Media can be removed for processing by opening the locked cabinet underneath the table to begin the decommissioning process.

1) Media is removed from the Red "Media to be Degaussed" bin and inserted into the HD-3WXL Degausser. The HD-3WXL erases all information in less than six seconds and deposits it into the Yellow "Degaussed" bin.

2) Media is then removed from the Yellow bin and placed in the PD-4 Physical Hard Drive Destroyer where the hard drive is physically bent, broken and mangled.

3) The mangled media is then placed into the Blue Recycling container ready for recycling or disposal.

SPECIFICATIONS	
Includes:	SW-1, HD-3WXL, PD-4, 2 Color Coded Bins and Blue Recycle Can.
Storage Capacity	30-60 hard drives of various sizes
Security	(2) Tubular lock Mechanisims with (2) sets of keys
Fits	HD-3W Series Degausser in Center / PD-4/PD-8500 on top
Media Slot	HDD: 1.8", 2.5", 3.5", (up to 1.66" in height) Tape: DLT, LTO, 3480, QIC
Temperature	14°F - 104°F (-10°C - 40°C)
Humidity	10%H - 85%H (non-condensing)
Weight	SW-1 (Workstation Only): 56 lbs. Shipping 83 lbs. HD-3WXL: 66 Lbs. Shipping 95 lbs. PD-4: 82 lbs. Shipping 111 lbs.
Size	50 in. (W) x 26.5 in. (D) x 38.5 (H)
Accessories	Extra Bins
Warranty	1 Year Parts, 30 days labor.
Note	Hard Drives are not reusable after having been erased.
