

*Simply place your
tape(s) on the
turntable, close the
drawer and press
"Start"*

Drawer Degaussing:

The DDS-1800 automatically rotates media to be degaussed on an 18 inch round turntable. As the turntable rotates, the drawer automatically opens and moves the rotating turntable outward ensuring complete and even erasure. As the media gradually leaves the degaussing field, the media is left in a magnetically neutral state free of any data, time code or magnetic patterns.

Degaussing Coils:

The DDS-1800 has two high strength AC magnetic coils inside the magnetically shielded chassis. The coils work together to provide a degaussing force strong enough to erase DLT, Beta SP and other metal particle and oxide tape.

Automatic Degaussing:

Easy operation ensures consistent degaussing no matter who uses the DDS-1800. Simply:

- 1) Open drawer;
- 2) Place media on turntable;
- 3) Close drawer; and
- 4) Push degauss button.

PRODUCT HIGHLIGHTS

- Turntable design ensures even erasure.
- Erases all formats of media up to 18 inches in diameter and 2 inches in width.
- Tape erasure greater than -80db.
- Simple operation.
- Turntable will accommodate more than one tape at a time.
- Automatic cooling fan increases duty cycle.
- One year warranty.

SPECIFICATIONS

Cycle Time:	1 minute.
Table Diameter:	18 inches.
Field Strength:	4700 gauss.
Power Req.:	18A @ 208-240 VAC 50/60 Hz.
Weight	
Net:	145 lbs. (66 kg)
Shipping:	205 lbs. (92 kg)
Dimensions:	37.5 x 27.5 x 6 in. (95.25 x 69.9 x 15.2 cm)
